Japan	15.4	22.9	(7.5)

## Investment Perspectives

### Market

While supply chain disruptions continue to affect many businesses, the most likely scenario is that most bottlenecks will ease in the coming year and the recent bump in inflation will prove transitory. In the meantime, companies in our portfolio have strong competitive positions, giving them bargaining power over their customers and suppliers, and enabling many of them to protect margins by raising prices. The semiconductor chip shortage, however, may persist since costly capacity expansions take several years and demand for semiconductors will only increase, led by new applications ranging from automotive electrification to artificial intelligence. Intermittent pandemic-forced shutdowns have also been a culprit in supply chain troubles, leading to increased demand for industrial automation products. Even as supply chain issues ease, we expect the secular trend of rising industrial automation to continue.

### Portfolio

Our Swiss Health Care stocks have strongly performed year to date, especially pharmaceutical contract developer and manufacturer **Lonza**. During its recent capital markets day, Lonza highlighted growth prospects through 2024 and outlined an ambitious capital expansion plan. With its recent divestiture of its specialty ingredients business, Lonza has ample liquidity to pursue facility expansions. These investments are substantially de-risked by the company's large and diverse set of customers, its substantial backlog and pipeline, and its long-duration contracts, which provide some certainty on future revenues.

## Ten Largest Holdings

Company	Market	Sector
Infineon Technologies	Germany	Info Technology
Atlas Copco	Sweden	Industrials
L'Oréal	France	Cons Staples
Adyen	Netherlands	Info Technology
Roche	Switzerland	Health Care
Schneider Electric	France	Industrials
AIA Group	Hong Kong	Financials
Lonza	Switzerland	Health Care
DBS Group	Singapore	Financials
Allianz	Germany	Financials

Geography	0.3	-0.5	-0.2

- Growth outperformed, providing a tailwind to the portfolio.
- Swedish industrials—**Alfa Laval**, **Atlas Copco**, and **Epiroc**—continued to perform well even with lingering supply chain uncertainties.
- Our investments in Information Technology (IT), particularly software & services, also strongly contributed. Dutch payments processor **Adyen** and French design software company **Dassault Systèmes** led the group; the latter reported robust quarterly results and raised guidance for the second time this year. German semiconductor manufacturer **Infineon Technologies** introduced impressive new guidance, calling for double-digit revenue growth in automotive, its largest segment.

- Financials detracted the most, especially our insurance holdings, including Hong Kong-based life insurer **AIA Group** and German insurer **Allianz**. Good returns in Swedish Industrials holdings provided some offset.
- The chip shortage impacted returns in IT. Our semiconductor manufacturing holding, **TSMC**, trailed equipment makers like ASML (not held) that stand to benefit from myriad plant expansions.
- Health Care performed strongly, boosted by our Swiss holdings. As discussed above, Lonza announced a positive long-term outlook. Ophthalmology specialist Alcon and hearing aid manufacturer **Sonova Holding** both reported market share gains.

## Disclosures

Past performance does not guarantee future results. The holdings identified do not represent all of the securities purchased, sold, or recommended for advisory clients.

For comparison purposes the Composite return is measured against the MSCI EAFE Total Return Index (Gross). Harding Loevner LP is an investment adviser registered with the Securities and Exchange Commission. Harding Loevner claims compliance with the Global Investment Performance Standards (GIPS®). Harding Loevner has been independently verified for the period November 1, 1989 through June 30, 2021. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The EAFE Composite has had a performance examination for the periods through June 30, 2021. The verification and performance examination reports are available upon request. Performance data quoted represents past performance; past performance does not guarantee future results. Returns are presented both gross and net of management fees and include the reinvestment of all income. Net returns are calculated using actual fees. The US dollar is the currency used to express performance. For complete information on the construction and historical record of the EAFE Composite, please contact Harding Loevner at (908) 218-7900 or visit [www.hardingloevner.com](http://www.hardingloevner.com). The firm maintains a complete list of composite descriptions, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds, which are available upon request.
