Investment Perspectives

Market

After a positive start to the year, the US market declined 1.6% this month due to concerns that US government policies would weigh on economic growth and consumer and corporate sentiment. Meanwhile, building on strength last month, Europe rose 3%. Emerging Markets were flat overall; China rose nearly 12%, offsetting weakness in other countries such as India (down 8%) and Taiwan (down 4%). By sector, Consumer Staples fared best, up more than 4%, while Consumer Discretionary fell the most, nearly 5%.

Portfolio

Recent weakness in Information Technology—caused by policy uncertainty and the possible effects of that policy on AI supply chains, as well as the release of DeepSeek’s AI model—has created opportunities. This month, we repurchased **ASML**, the Dutch advanced photolithography equipment supplier, after selling it last year following a nearly two-year surge in its shares. Since we sold it, the company cut its 2025 outlook due to caution on export control risks with China and a demand reset in extreme ultraviolet (EUV) technology after Samsung and Intel delayed leading edge chip production to 2026. ASML remains the top lithography equipment provider, critical at the leading edge of chip production, with no credible rival. When we repurchased, ASML’s shares were 20% below our sell price. Looking ahead, the company should benefit from **TSMC**’s 2-nanometer process node ramp-up, which requires more EUV tooling, its fab buildouts in Arizona and Japan, and its joint ventures in Europe.

Ten Largest Holdings

Company	Market	Sector
Meta Platforms	US	Comm Services
Alphabet	US	Comm Services
Microsoft	US	Info Technology
Tencent	China	Comm Services
Amazon.com	US	Cons Discretionary
Netflix	US	Comm Services
Vertex Pharmaceuticals	US	Health Care
Schneider Electric	France	Industrials
Accenture	US	Info Technology
CME Group	US	Financials

"HL": Global Equity ADR model portfolio. "Index": MSCI All Country World Index.
 "Frontier Markets": Includes countries with less-developed markets outside the index.

Ten Largest Holdings are the top ten holdings by weight. Please read the disclosures on the last page, which are an integral part of this presentation.

- In Information Technology (IT), key detractors included customer relationship management software company **Salesforce** and IT services business **Globant**, whose shares were hurt by concerns over slowing growth in the US. Globant also indicated business sentiment in its key Latin America markets could be hurt by political uncertainty and US tariff policies.
- In Consumer Discretionary, Japanese electronics and media company **Sony** reported better-than-expected results, boosted by strong revenue growth in its gaming division.
- Poor results in the US were primarily due to internet giant **Alphabet** and Globant. The January release of powerful, low-cost, AI models by China's Deepseek and Alibaba may pose a competitive threat to Alphabet's nascent AI business.

- IT investments detracted the most, including Globant, Salesforce, and semiconductor designer **Broadcom**. Shares of the latter fell amid rising uncertainty about demand for AI chips. Our underweight to another chip designer, **NVIDIA**, was helpful.
- Communication Services company **Meta Platforms** has shown that it has already benefited from expenditures on AI, which have led to improved user engagement and monetization.
- While US holdings detracted overall, relative returns were helped by Meta and **Vertex Pharmaceuticals**, whose stock jumped on news that the US Food and Drug Administration had approved the company's non-opioid (and, importantly, non-addictive) pain drug Journavx. The absence in the portfolio of auto company Tesla was also a positive.

Top Five Contributors/Detractors (%) | Feb. to Relative Returns

Disclosures

Past performance does not guarantee future results. Invested capital is at risk of loss. The holdings identified do not represent all of the securities purchased, sold, or recommended for advisory clients.

For comparison purposes the composite return is measured against the MSCI All Country World Total Return Index (Gross). From 2001 (when the net index first became available) through December 30, 2012, the index return is presented net of foreign withholding taxes. Beginning December 31, 2012, Harding Loevner LP presents the gross version of the index to conform the benchmark's treatment of dividend withholding with that of the composite. Harding Loevner LP is an investment adviser registered with the Securities and Exchange Commission. Harding Loevner claims compliance with the Global Investment Performance Standards (GIPS®). Harding Loevner has been independently verified for the period November 1, 1989 through September 30, 2024. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Global Equity ADR composite has had a performance examination for the periods December 1, 1989 through September 30, 2024. The verification and performance examination reports are available upon request. Performance data quoted represents past performance; past performance does not guarantee future results. Returns are presented both gross and net of management fees and include the reinvestment of all income. Net returns are calculated using actual fees. The US dollar is the currency used to express performance. For complete information on the construction and historical record of the Global Equity ADR composite, please contact Harding Loevner at (908) 218-7900 or invest@hlmet.com. The firm maintains a complete list of composite descriptions, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds, which are available upon request. The MSCI All Country World Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global developed and emerging markets. The index consists of 47 developed and emerging market countries. The MSCI World Index is a free float-adjusted market capitalization index that is designed to measure global developed market equity performance. The index consists of 23 developed market countries. You cannot invest directly in these indexes.

Companies held in the portfolio at the end of the month appear in bold type; only the first reference to a particular holding appears in bold. The portfolio is actively managed therefore holdings may not be current. They should not be considered recommendations to buy or sell any security. It should not be assumed that investment in the securities identified has been or will be profitable. The portfolio holdings identified above do not represent all of the securities held in the portfolio. To request a complete list of holdings for the past year, please contact Harding Loevner. The following information is available upon request: (1) information describing the methodology of the contribution data and (2) a list showing the weight and relative contribution to return of all holdings during the month.

Portfolio holdings, portfolio attribution, contributors and detractors, and sector/geographic portfolio positioning are supplemental information only and complement a fully compliant Global Equity ADR composite GIPS Presentation, which is available upon request. Performance of contributors and detractors is net of fees, which is calculated by taking the difference between net and gross composite performance for the Global Equity ADR strategy prorated by asset weight in the portfolio and subtracted from each security's return. The composite and attribution returns may show discrepancies due to the different data sources for these returns. Composite performance is obtained from Harding Loevner's accounting system and attribution returns are obtained from the FactSet portfolio analysis system. Please note returns from FactSet are not audited for GIPS compliance and are for reference only.
