Investment Perspectives

Market

Amid the uncertainty of renewed tariff threats and pauses, global developed stock markets rose in May with the US market leading the way for the first full month since Donald Trump's re-election in November 2024. Year-to-date, non-US market gains have outstripped the US with Europe leading the way, up 21% compared to a 1% gain in the US, in part due to the weakness of the dollar. Trump's proposed "big beautiful" budget bill sparked fears of escalating US debt, compounding the pressure on the dollar caused by erratic trade policy. While macroeconomic and political news dominated the headlines, strong corporate results helped push stocks higher across most sectors. Information Technology (IT) stocks rebounded most, while Health Care was the only sector in negative territory.

Portfolio

In May, both our overweight in Health Care and our stock picking within the poorly performing sector hurt relative returns. UnitedHealth Group (UNH) fell over 25% in the month on reports of a potential US Department of Justice investigation and by the uncertainty around the future profitability of UNH's Medicare Advantage (MA) business. Both developments cloud UNH's future earnings trajectory. We are particularly concerned about the company's ability to manage margin pressure in MA. Although pricing adjustments could help restore margins, they risk dampening future enrollment growth. As a result, we sold our holding.

Benchmark Performance | May

Total Return by Sector (%) Total Return by Region (%)

Performance Attribution | May

- Several of our other Health Care holdings underperformed. Trump's executive order aimed at reducing prescription drug prices weighed on pharmaceutical stocks. Vertex Pharmaceuticals shares fell on weaker-than-expected first quarter results. Swiss eye care manufacturer Alcon reported disappointing first-quarter growth and reduced its 2025 outlook citing tariff effects.
- In Communication Services, US-based advertising services company
 The Trade Desk delivered strong first quarter results, with revenue up 25% year-over-year, well above consensus expectations.
- In IT, we repurchased NVIDIA in the fourth quarter of 2024 and added to our holding in April, but not owning more of it hurt relative returns as it rebounded sharply after posting record results.

Benchmark Performance | YTD

Performance Attribution | YTD

- The portfolio has faced strong style headwinds, as stocks in the lower-quality, slower-growth, and cheaper quintiles of the market outperformed.
- In IT, Salesforce lagged after guidance suggested that customer uptake of agentic AI might not be happening as quickly as investors originally hoped.
- In Communication Services, streaming platform Netflix delivered strong first-quarter results, with management noting that they have not seen headwinds from potentially declining economic conditions in the US.
- The absence of two poorly performing "Magnificent Seven" stocks from our portfolio, Tesla and Apple (the former never held, the latter sold in the first quarter), has added to relative returns.
