"HL": Global Equity model portfolio. "Index": MSCI All Country World Index.
"Frontier Markets": Includes countries with less-developed markets outside the index.

Investment Perspectives

Market

Stocks rebounded as inflation data improved, central banks paused rate hikes, and US-China relations appeared less frosty after Presidents Joe Biden and Xi Jinping met. All sectors and regions rose. A rotation to growth stocks boosted Information Technology, while the rise of Industrials shares may be a sign of improving consumer and business sentiment. Falling oil prices weighed on the Energy sector. By region, stocks fared well across all major markets with the notable exception of China, which lagged again this month despite an improvement in retail sales and industrial production data.

Portfolio

Shares of Dutch payment processing firm **Adyen** recovered sharply. Last quarter, shares fell after the company reported margin pressure from recent staffing expansions and lower revenue growth due to competitive pricing pressures in the US ecommerce market. At its November 8 investor day, the company reiterated its long-term strategy and competitive advantage and wowed investors with its forward-looking guidance. Management projected that, through 2026, Adyen would see annual revenue growth in the low-to-high 20% range and beginning in 2024 a gradual expansion of EBITDA margins, which are anticipated to exceed 50% by 2026. Although the guidance is below the targets set by management last year, it is well above the level to which consensus estimates had fallen and consistent with our belief that Adyen's technological edge and superior digital payments platform will enable the company to take share from competitors in a fast-growing industry.

Ten Largest Holdings

Company	Market	Sector
Schneider Electric	France	Industrials
Alphabet	US	Comm Services
Vertex Pharmaceuticals	US	Health Care
Amazon.com	US	Cons Discretionary
Meta Platforms	US	Comm Services
Microsoft	US	Info Technology
Thermo Fisher Scientific	US	Health Care
John Deere	US	Industrials
UnitedHealth Group	US	Health Care
CME Group	US	Financials

Ten Largest Holdings are the top ten holdings by weight. Please read the disclosures on the last page, which are an integral part of this presentation.

- Strong quarterly results at **Netflix** and **Pinterest** helped power Communication Services stock selection.
- In the Consumer Staples sector, **L'Oréal** shares rose after the company put on an impressive display of its beauty technologies at its capital markets day.
- By region, we outperformed most in Europe inside the eurozone. Shares of **Adyen**, **Schneider Electric**, and **SAP** all rose sharply after reporting strong results.
- US stock selection hurt as **Vertex Pharmaceutical's** shares dipped after a strong YTD rise, and the stock price of energy services business **SLB** slipped with the decline in oil prices.

- Exposure to SVB Financial Group and First Republic Bank was the largest detractor. SVB was placed into receivership in mid-March following accelerated withdrawals. We sold First Republic, but not before its shares fell drastically in the wake of SVB's collapse.
- Industrials stock selection also hurt relative performance. While **John Deere** continues to report strong results underpinned by good pricing and solid execution, evidence that the agricultural cycle had peaked weighed on its shares, more than offsetting strong gains by other holdings in the sector.
- The surge in spending on applications related to artificial intelligence has benefited several of our holdings, including **Meta Platforms**, **Alphabet**, **Salesforce**, and **Synopsys**.

Disclosures

Past performance does not guarantee future results. Invested capital is at risk of loss. The holdings identified do not represent all of the securities purchased, sold, or recommended for advisory clients.

For comparison purposes the composite return is measured against the MSCI All Country World Total Return Index (Gross). Harding Loevner LP is an investment adviser registered with the Securities and Exchange Commission. Harding Loevner claims compliance with the Global Investment Performance Standards (GIPS®). Harding Loevner has been independently verified for the period November 1, 1989 through June 30, 2023. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Global Equity composite has had a performance examination for the periods December 1, 1989 through June 30, 2023. The verification and performance examination reports are available upon request. Performance data quoted represents past performance; past performance does not guarantee future results. Returns are presented both gross and net of management fees and include the reinvestment of all income. Net returns are calculated using actual fees. The US dollar is the currency used to express performance. For complete information on the construction and historical record of the Global Equity composite, please contact Harding Loevner at (908) 218-7900 or invest@hlnet.com. The firm maintains a complete list of composite descriptions, a list of limited distribution pooled fund descriptions, and a list of broad distribution pooled funds, which are available upon request. The MSCI All Country World Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global developed and emerging markets. The index consists of 47 developed and emerging market countries. The MSCI World Index is a free float-adjusted market capitalization index that is designed to measure global developed market equity performance. The index consists of 23 developed market countries. You cannot invest directly in these indexes.

Companies held in the portfolio at the end of the month appear in bold type; only the first reference to a particular holding appears in bold. The portfolio is actively managed therefore holdings may not be current. They should not be considered recommendations to buy or sell any security. It should not be assumed that investment in the securities identified has been or will be profitable. The portfolio holdings identified above do not represent all of the securities held in the portfolio. To request a complete list of holdings for the past year, please contact Harding Loevner. The following information is available upon request: (1) information describing the methodology of the contribution data and (2) a list showing the weight and relative contribution to return of all holdings during the month.

Portfolio holdings, portfolio attribution, contributors and detractors, and sector/geographic portfolio positioning are supplemental information only and complement a fully compliant Global Equity composite GIPS Presentation, which is available upon request. Performance of contributors and detractors is net of fees, which is calculated by taking the difference between net and gross composite performance for the Global Equity strategy prorated by asset weight in the portfolio and subtracted from each security's return. The composite and attribution returns may show discrepancies due to the different data sources for these returns. Composite performance is obtained from Harding Loevner's accounting system and attribution returns are obtained from the FactSet portfolio analysis system. Please note returns from FactSet are not audited for GIPS compliance and are for reference only.
