

Institutional Emerging Markets Portfolio

Portfolio Summary | February 28, 2025 | Institutional Class HLMEX

Before you invest, you may want to review the Portfolio's prospectus, which contains more information about the Portfolio and its risks. You can find the Portfolio's prospectus and other information about the Portfolio online at www.hardingloevnerfunds.com. You can also get this information at no cost by calling (877) 435-8105 or by sending an e-mail request to hardingloevnerfunds@ntrs.com. If you purchase shares of the Portfolio through a financial intermediary, the prospectus and other information will also be available from your financial intermediary. The current prospectus and statement of additional information, dated February 28, 2025, and as each may be supplemented thereafter, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website, phone number or e-mail address noted above.

Investment Objective

The Institutional Emerging Markets Portfolio (the "Portfolio") seeks long-term capital appreciation through investments in equity securities of companies based in emerging markets.

Portfolio Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Institutional Class of the Portfolio.

You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.

Shareholder Fees

(Fees Paid Directly from Your Investment)

Maximum Sales Charge (Load) Imposed on Purchases (As a Percentage of Offering Price)	None
--	------

Redemption Fee (As a Percentage of Amount Redeemed within 90 days or Less from the Date of Purchase)	None
--	------

Annual Portfolio Operating Expenses

(Expenses that You Pay Each Year as a Percentage of the Value of Your Investment)

Management Fees	0.85%
Distribution (Rule 12b-1) Fees	None
Other Expenses	0.22%
Total Annual Portfolio Operating Expenses¹	1.07%
Fee Waiver and/or Expense Reimbursement ^{1,2}	-0.02%

Total Annual Portfolio Operating Expenses After Fee Waiver and/or Expense Reimbursement^{1,2}	1.05%
--	--------------

¹ Expense information in this table has been restated to reflect current fees. Therefore, the expenses in this table will not correlate to the expenses shown in the Financial Highlights of the Portfolio.

²Harding Loevner LP has contractually agreed to waive a portion of its management fee and/or reimburse the Portfolio's Institutional Class shares for its other operating expenses to the extent Total Annual Portfolio Operating Expenses (excluding taxes, interest, borrowing costs, overdraft charges, litigation and indemnification, extraordinary expenses, brokerage and other transaction expenses relating to the purchase and sale of portfolio investments and acquired fund fees and expenses), as a percentage of average daily net assets, exceed 1.05% through February 28, 2026. This fee waiver and expense reimbursement agreement may be terminated by the Board at any time and will automatically terminate upon the termination of the Portfolio's investment advisory agreement.

Example:

This example is intended to help you compare the cost of investing in the Institutional Class of the Portfolio with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Institutional Class of the Portfolio for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Institutional Class's operating expenses remain the same, except that the example assumes the fee waiver and expense reimbursement agreement pertains only through February 28, 2026. The example does not take into account brokerage commissions that you may pay on your purchases and sales of Institutional Class shares of the Portfolio. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$107	\$338	\$588	\$1,304

Portfolio Turnover

The Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Portfolio shares are held in a taxable account. These costs, which are not reflected in annual portfolio operating expenses or in the example, affect the Portfolio's performance. During the most recent fiscal year, the Portfolio's portfolio turnover rate was 30% of the average value of its portfolio.

Principal Investment Strategies

The Portfolio invests primarily in companies that are based in emerging and frontier markets. Emerging and frontier markets offer investment opportunities that arise from long-term trends in demographics, deregulation, offshore outsourcing, and improving corporate governance in developing countries. Harding Loevner LP ("Harding Loevner"), the Portfolio's investment adviser, undertakes fundamental research in an effort to identify companies that are well managed, financially sound, fast growing, and strongly competitive, and whose shares are reasonably priced relative to estimates of their value. To reduce its volatility, the Portfolio is diversified across dimensions of geography, industry, and currency. The Portfolio normally holds investments across at least 15 countries.

Emerging and frontier markets include countries that have an emerging stock market as defined by Morgan Stanley Capital International, countries or markets with low-to middle-income economies as classified by the World Bank, and other countries or markets with similar characteristics. Emerging and frontier markets tend to have relatively low gross national product per capita compared to the world's major economies and may have the potential for rapid economic growth.

Factors bearing on whether a company is considered to be "based" in an emerging or frontier market may include: (1) it is legally domiciled in an emerging or frontier market; (2) it conducts at least 50% of its business, as measured by the location of its

sales, earnings, assets, or production, in an emerging or frontier market; or (3) it has the principal exchange listing for its securities in an emerging or frontier market.

At least 65% of the Portfolio's total assets will be denominated in at least three currencies other than the U.S. dollar. For purposes of compliance with this restriction, American Depositary Receipts, Global Depositary Receipts, and European Depositary Receipts (collectively, "Depositary Receipts") will be considered to be denominated in the currency of the country where the securities underlying the Depositary Receipts are principally traded.

The Portfolio invests at least 65% of its total assets in common stocks, preferred stocks, rights, and warrants issued by companies that are based in emerging or frontier markets, securities convertible into such securities (including Depositary Receipts), and investment companies that invest in the types of securities in which the Portfolio would normally invest. The Portfolio also may invest in securities of U.S. companies that derive, or are expected to derive, a significant portion of their revenues from their foreign operations, although under normal circumstances, not more than 15% of the Portfolio's total assets will be invested in securities of U.S. companies.

The Portfolio invests, under normal circumstances, at least 80% of its net assets (plus any borrowings for investment purposes) in emerging markets securities, which includes frontier markets securities, and investment companies that invest in the types of securities in which the Portfolio would normally invest.

Because some emerging market countries may present difficulties for efficient foreign investment, the Portfolio may use equity derivative securities to gain exposure to those countries.

Principal Risks

The Portfolio is subject to numerous risks, any of which could cause an investor to lose money. The principal risks of the Portfolio are as follows:

Market Risk. The value of investments in the Portfolio may fluctuate suddenly and unexpectedly as a result of various market and economic factors, including those affecting individual companies, issuers or particular industries.

Currency Risk. Foreign currencies may experience steady or sudden devaluation relative to the U.S. dollar, adversely affecting the value of the Portfolio's investments. Because the Portfolio's net asset value is determined on the basis of U.S. dollars, if the local currency of a foreign market depreciates against the U.S. dollar, you may lose money even if the foreign market prices of the Portfolio's holdings rise.

Foreign Investment Risk. Securities issued by foreign entities involve risks not associated with U.S. investments. These risks include additional taxation, political, economic, social, geopolitical or diplomatic instability, and the above-mentioned possibility of changes in foreign currency exchange rates. There may also be less publicly-available information about a foreign issuer. Such risks may be magnified with respect to securities of issuers in frontier emerging markets.

Emerging and Frontier Market Risk. The Portfolio may invest in the securities of companies in emerging and frontier markets

(including China, which generally comprises a significant percentage of emerging markets benchmarks). Emerging and frontier market securities involve certain risks, such as exposure to economies less diverse and mature than that of the United States or more established foreign markets. In addition, companies in emerging and frontier markets may not be subject to the same disclosure, accounting, auditing and financial reporting standards and practices as U.S. or developed market countries. Such companies may also be located in countries where the universe of eligible investments is impacted by U.S. sanctions laws. Economic or political instability may cause larger price changes in emerging or frontier market securities than in securities of issuers based in more developed foreign countries. The smaller size and lower levels of liquidity in emerging markets, as well as other social, economic, regulatory and political factors, contribute to greater volatility. Because of this volatility, this Portfolio is better suited for long-term investors.

NAV Risk. The net asset value of the Portfolio and the value of your investment will fluctuate.

Risks Associated with China and Hong Kong. Investing in Chinese companies will subject the Portfolio more generally to the risks associated with investing in China and Hong Kong.

Investments in China involve risk of a total loss due to government action or inaction or other adverse circumstances. The Chinese government exercises significant control over China's economy through its industrial policies (e.g., allocation of resources and other preferential treatment), monetary policy, management of currency exchange rates, and management of the payment of foreign currency-denominated obligations, among other methods. Changes in these policies could adversely impact affected industries or Chinese companies. China's economy, particularly its export-oriented industries, may be adversely impacted by trade or political disputes with China's major trading partners, including the United States. For example, there is a risk that the United States government or other governments may sanction Chinese issuers or otherwise prohibit U.S. persons (such as the Fund) from investing in certain Chinese issuers, which may negatively affect the liquidity and price of their securities and cause the government of China to take retaliatory measures.

Recent developments in relations between the United States, other trading partners, and China have heightened concerns of increased tariffs and restrictions on trade between the two countries. An increase in tariff or trade restrictions (and threats thereof) could lead to a significant reduction in international trade, which could have a negative impact on China's export industry, Chinese issuers, the liquidity or price of the Portfolio's direct or indirect investments in China, and therefore, the Portfolio.

Accounting, auditing, financial, and other reporting standards, practices and disclosure requirements in China are different, sometimes in fundamental ways, from those in the United States and certain Western European countries and, therefore, disclosure of certain material information may not be made. Although the Chinese government adopted a new set of Accounting Standards for Business Enterprises effective January 1, 2007, which are similar to the International Financial Reporting Standards, the accounting practices in China continue to be frequently criticized and challenged. In addition, China does not allow the Public Company

Accounting Oversight Board to inspect the quality of audits performed in China for Chinese companies in which the Portfolio may invest. That inspection organization conducts on-going reviews of audits by U.S. accounting firms. Consequently, financial reporting by companies domiciled in China does not have as much regulatory oversight as reporting by companies in the United States, which may result in the unavailability of material information about issuers. The Portfolio may also be limited in its ability to invest in certain securities by executive orders and other regulatory actions that target publicly-traded securities of Chinese companies.

As part of Hong Kong's transition from British to Chinese sovereignty in 1997, China agreed to allow Hong Kong to maintain a high degree of autonomy with regard to its political, legal and economic systems for a period of at least 50 years. However, as of July 2020, the Chinese Standing Committee of the National People's Congress enacted the law of the PRC on Safeguarding National Security in the Hong Kong Special Administrative Region. As of the same month, Hong Kong is no longer afforded preferential economic treatment by the United States under U.S. law, and there is uncertainty as to how the economy of Hong Kong will be affected. Ongoing political tension between the People's Republic of China and the Hong Kong Special Administrative Region will have impacts on the economy of Hong Kong, and these impacts remain uncertain. If China were to further exert its authority so as to alter the economic, political or legal structures or the existing social policy of Hong Kong, investor and business confidence in Hong Kong could be negatively affected, which in turn could negatively affect markets and business performance and have an adverse effect on the Portfolio's investments. The Shanghai and Shenzhen stock exchanges may close for extended periods for holidays or otherwise, which impacts the Portfolio's ability to trade in A-Shares during those periods. In addition, the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect programs, which are used by foreign investors to access China A-Shares, are relatively new structures that are subject to certain legal and structural risks.

Risk Relating to Investing in Taiwan. Investments in Taiwanese issuers involve risks that are specific to Taiwan, including legal, regulatory, political, currency and economic risks. Political and economic developments of Taiwan's neighbors may have an adverse effect on Taiwan's economy. Specifically, Taiwan's geographic proximity and history of political contention with China have resulted in ongoing tensions, including the risk of war, which may materially affect the Taiwanese economy and its securities market.

Financials Sector Risk. The Portfolio is vulnerable to events affecting companies in the financials sector. Examples of risks affecting the financials sector include changes in governmental regulation, issues relating to the availability and cost of capital, changes in interest rates and/or monetary policy, bank failures and price competition. In addition, financials companies are often more highly leveraged than other companies, making them inherently riskier. As of October 31, 2024, the Portfolio had 24.7% of net assets invested in the financials sector.

Depository Receipts Risk. American Depositary Receipts ("ADRs") as well as other forms of depository receipts, including European Depositary Receipts ("EDRs") and Global Depositary Receipts ("GDRs"), are certificates evidencing ownership of shares of a foreign issuer. These certificates are issued by depository banks

and generally trade on an established market in the United States or elsewhere. The underlying shares are held in trust by a custodian bank or similar financial institution in the issuer's home country. ADRs, EDRs and GDRs are alternatives to directly purchasing the underlying foreign securities in their national markets. However, ADRs, EDRs, and GDRs are subject to many of the risks associated with investing directly in foreign securities, including foreign exchange risk and the political, economic, and social risks of the underlying issuer's country.

Portfolio Performance

The following bar chart shows how the investment results of the Portfolio's Institutional Class shares have varied from year to year. The table that follows shows how the average annual total returns of the Portfolio's Institutional Class shares compare with a broad measure of market performance. Together, these provide an indication of the risks of investing in the Portfolio. How the Institutional Class shares of the Portfolio have performed in the past (before and after taxes) is not necessarily an indication of how they will perform in the future.

Updated Portfolio performance information is available at www.hardingloevnerfunds.com or by calling (877) 435-8105.

Institutional Emerging Markets Portfolio Institutional Class

The best calendar quarter return during the period shown above was 22.68% in the fourth quarter of 2020; the worst was -27.64% in the first quarter of 2020.

Average Annual Total Returns (for the Periods Ended December 31, 2024)

	1-Year	5-Year	10-Year
Institutional Emerging Markets Portfolio – Institutional Class			
Return Before Taxes	2.68%	-2.80%	1.65%
Return After Taxes on Distributions ¹	0.00%	-3.31%	1.33%
Return After Taxes on Distributions and Sale of Portfolio Shares ¹	4.12%	-1.87%	1.46%
MSCI Emerging Markets (Net) Index (Reflects No Deduction for Fees, Expenses, or U.S. Taxes)	7.50%	1.70%	3.64%

¹After-tax returns in the table above are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Portfolio shares through tax-deferred arrangements, such as 401(k) plans or Individual Retirement Accounts.

Management

Investment Adviser

Harding Loevner serves as investment adviser to the Portfolio.

Portfolio Managers

Scott Crawshaw, Pradipta Chakraborty, Lee Gao and Babatunde Ojo serve as the portfolio managers of the Emerging Markets Portfolio. Mr. Crawshaw has held his position since June 2014, Mr. Chakraborty has held his position since January 2015, Mr. Gao has held his position since January 2023 and Mr. Ojo has held his position since January 2024. Messrs. Crawshaw and Chakraborty are the co-lead portfolio managers.

Purchase and Sale of Portfolio Shares

The minimum initial investment in the Institutional Class of the Portfolio is \$500,000. Additional purchases may be for any amount. You may purchase, redeem (sell) or exchange shares of the Portfolio on any business day through certain authorized brokers and other financial intermediaries or directly from the Portfolio by mail, telephone, or wire.

Tax Considerations

The Portfolio's distributions are generally taxable to you as ordinary income, capital gains, or a combination of the two, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Upon withdrawal, your investment through a tax-deferred arrangement may become taxable.

Payments to Brokers-Dealers and Other Financial Intermediaries

If you purchase Portfolio shares through a broker-dealer or other financial intermediary (such as a bank), the Portfolio and its related companies may pay the intermediary for the sale of Portfolio shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Portfolio over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
