

Emerging Markets ex China Portfolio

Fact Sheet | Institutional Class | Ticker: HLXCX | December 31, 2023

Objective

The Emerging Markets ex China Portfolio seeks long-term capital appreciation through investments in equity securities of companies based in emerging markets.

Philosophy and Process

We believe a diversified portfolio of high-quality, durable-growth companies purchased at reasonable prices will provide superior investment returns with below-average risk over the long term. Our analysts conduct careful bottom-up research of individual companies and analyze the competitive dynamics of their industries to identify what we believe are the best growth companies and to assess the value of their shares. To qualify for investment, companies must be well-managed, financially strong, and possess clear competitive advantages relative to their peers.

Disclosures

Source (Characteristics): FactSet (Run Date: January 5, 2024 based on the latest available data in FactSet on this date.), based on the Portfolio's underlying holdings.

Profit Margin: relationship of net income to net sales. Return on Assets: net income for past 12 months divided by total assets. Return on Equity: the net income divided by total common equity outstanding, expressed as a percent. Debt/Equity Ratio: total long-term debt divided by total shareholder's equity. Sales Per Share: the total revenue earned per share for the past 12 months. Earnings Per Share: portion of a company's profit allocated to each outstanding share of common stock. Cash Flow: a measure of the cash generating capability of a company calculated by adding non-cash charges (e.g. depreciation) and interest expense to pretax income. Price/Earnings: the ratio of a firm's closing stock price and its trailing 12 months' earnings/share. Price/Cash Flow: the ratio of a firm's closing stock price and its fiscal year end cash flow/share. Price/Book: the ratio of a firm's closing stock price and its fiscal year end book value/share. Average Weighted Market Capitalization: the product of a security's price and the number of shares outstanding. Median Market Cap: the point at which half of the market value of a portfolio is invested in stocks with a greater market cap, and consequently the other half is invested in stocks with a lower market cap. Turnover: calculated by dividing the lesser of amounts of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the fiscal year.

The MSCI Emerging Markets ex China Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets excluding China. The index consists of 23 emerging market countries. The index is net of foreign withholding taxes on dividends. You cannot invest directly in this index.

The Portfolio invests in foreign securities, which will involve greater volatility and political, economic, and currency risks and differences in accounting methods. It also invests in emerging markets, which involve unique risks, such as exposure to economies less diverse and mature than the U.S. or other more established foreign markets. Economic and political instability may cause larger price changes in emerging markets securities than other foreign securities. Investing in participation notes involve the same risks associated with a direct investment in the underlying security, currency or market.

The Portfolio's investment objectives, risks, charges and expenses must be read and considered carefully before investing. The statutory and summary prospectuses contain this and other important information about the investment company. They may be obtained by calling toll free (877) 435-8105 or visiting hardingloevnerfunds.com.

While the Portfolio is "no load", management and other expenses still apply. Please refer to the Prospectus for further details. The Portfolio is distributed by Quasar Distributors, LLC.
