HARDING LOEVNER

Objective

The Frontier Emerging Markets Portfolio seeks long-term capital appreciation through investments in equity securities of companies based in frontier and smaller emerging markets.

Philosophy and Process

We believe a diversified portfolio of high-quality, durable-growth companies purchased at reasonable prices will provide superior investment returns with below-average risk over the long term. Our analysts conduct careful bottom-up research of individual companies and analyze the competitive dynamics of their industries to identify what we believe are the best growth companies and to assess the value of their shares. To qualify for investment, companies must be well-managed, financially strong, and possess clear competitive advantages relative to their peers.

The MSCI Frontier Emerging Markets Index is a free float-adjusted market capitalization index designed to measure equity market performance in all countries from the MSCI Frontier Markets Index and the lower size spectrum of the MSCI Emerging Markets Index. The index consists of 28 frontier markets and 4 emerging markets. The index is net of foreign withholding taxes on dividends. You cannot invest directly in this index.
