

**INVESTMENT OBJECTIVE**

The Global Equity Portfolio seeks long-term capital appreciation through investments in equity securities of companies based both inside and outside the United States.

**INVESTMENT PHILOSOPHY & PROCESS**

We believe a diversified portfolio of high-quality, durable-growth companies purchased at reasonable prices will provide superior investment returns with below-average risk over the long term. Our analysts conduct careful bottom-up research of individual companies and analyze the competitive dynamics of their industries to identify what we believe are the best growth companies and to assess the value of their shares. To qualify for investment, companies must be well-managed, financially strong, and possess clear competitive advantages relative to their peers.

**The Portfolio invests in foreign securities, which will involve greater volatility and political, economic, and currency risks and differences in accounting methods. It also invests in emerging markets, which involve unique risks, such as exposure to economies less diverse and mature than the U.S. or other more established foreign markets. Economic and political instability may cause larger price changes in emerging markets securities than other foreign securities. Investing in participation notes involve the same risks associated with a direct investment in the underlying security, currency or market. The securities of smaller and medium-sized companies have historically exhibited more volatility with a lower degree of liquidity than larger companies.**
