

INVESTMENT OBJECTIVE

The International Equity Research Portfolio seeks long-term capital appreciation through investments in equity securities of companies based outside the United States.

INVESTMENT PHILOSOPHY & PROCESS

We believe a diversified portfolio of high-quality, durable-growth companies purchased at reasonable prices will provide superior investment returns with below-average risk over the long term. Our analysts conduct careful bottom-up research of individual companies and analyze the competitive dynamics of their industries to identify what we believe are the best growth companies and to assess the value of their shares. To qualify for investment, companies must be well-managed, financially strong, and possess clear competitive advantages relative to their peers.

Returns are annualized for periods greater than one year.

CALENDAR YEAR RETURNS

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Portfolio may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling (877)435-8105 or visiting www.hardingloevnerfunds.com.

Diversification does not assure a profit or protect against a loss in a declining market.

The Net Expense Ratio is applicable to investors.

DISCLOSURES

Source (Alpha, Beta, R-Squared, Standard Deviation, Sharpe Ratio, Tracking Error): eVestment Alliance (eA); Harding Loevner International Equity Research Portfolio, based on the Portfolio returns; MSCI Inc. Source (Active Share): based on the Harding Loevner International Equity Research model.
Source (other Characteristics): FactSet (Run Date: April 3, 2020), based on the Portfolio's underlying holdings.

Profit Margin: relationship of gross profits to net sales. Return on Assets: net income for past 12 months divided by total assets. Return on Equity: the net income divided by total common equity outstanding, expressed as a percent. Debt/Equity Ratio: total long-term debt divided by total shareholder's equity. Earnings Per Share: portion of a company's profit allocated to each outstanding share of common stock. Alpha: a measure of risk-adjusted return. Beta: a measure of the portfolio's sensitivity to the market. R-Squared: a measure of how well a portfolio tracks the market. Active Share: the proportion of holdings by weight that differ from holdings of the benchmark index. Standard Deviation: the statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution. Sharpe Ratio: the return over the risk free rate per unit of risk. Tracking Error: a measure of how closely a portfolio follows the index to which it is benchmarked. Price/Earnings: the ratio of a firm's closing stock price & its trailing 12 months' earnings/share. Price/Cash Flow: the ratio of a firm's closing stock price & its fiscal year end cash flow/share. Price/Book: the ratio of a firm's closing stock price & its fiscal year end book value/share. Average Weighted Market Capitalization: the product of a security's price & the number of shares outstanding. MktCpMd

The Portfolio invests in foreign securities, which will involve greater volatility and political, economic, and currency risks and differences in accounting methods. It also invests in emerging markets, which involve unique risks, such as exposure to economies less diverse and mature than the U.S. or other more established foreign markets. Economic and political instability may cause larger price changes in emerging markets securities than other foreign securities. Such risks may be magnified for securities in frontier emerging markets. Investing in participation notes involve the same risks associated with a direct investment in the underlying security, currency or market. The securities of smaller and medium-sized companies have historically exhibited more volatility with a lower degree of liquidity than larger companies. The value of securities may fluctuate in response to various factors including, but not limited to, public health risks; these may be magnified if conditions and events adversely impact the global economy. The securities of smaller and medium-sized companies have historically exhibited more volatility with a lower degree of liquidity than larger companies.

The Portfolio's investment objectives, risks, charges and expenses must be read and considered carefully before investing. The statutory and summary prospectuses contain this and other important information about the investment company. They may be obtained by calling toll free (877) 435-8105, or visiting www.hardingloevnerfunds.com.

While the Portfolio is "no load", management and other expenses still apply. Please refer to the Prospectus for further details. The Portfolio is distributed by Quasar Distributors, LLC.
