

International Small Companies Portfolio

September 30, 2025 Fact Sheet | Investor Class | Ticker: HLMSX

Objective

The International Small Companies Portfolio seeks long-term capital appreciation through investments in equity securities of small companies based outside the United States.

Philosophy and Process

We believe a diversified portfolio of high-quality, durable-growth companies purchased at reasonable prices will provide superior investment returns with below-average risk over the long term. Our analysts conduct careful bottom-up research of individual companies and analyze the competitive dynamics of their industries to identify what we believe are the best growth companies and to assess the value of their shares. To qualify for investment, companies must be well-managed, financially strong, and possess clear competitive advantages relative to their peers.

Calendar Year Returns (%)

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Portfolio may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling (877) 435-8105 or visiting hardingloevnerfunds.com.

Diversification does not assure a profit or protect against a loss in a declining market.

Sales Per Share: the total revenue earned per share for the past 12 months. Earnings Per Share: portion of a company's profit allocated to each outstanding share of common stock. Cash Flow: a measure of the cash generating capability of a company calculated by adding non-cash charges (e.g. depreciation) and interest expense to pretax income. Alpha: a measure of risk-adjusted return. Beta: a measure of the portfolio's sensitivity to the market. R-Squared: a measure of how well a portfolio tracks the market. Active Share: the proportion of holdings by weight that differ from holdings of the benchmark index. Standard Deviation: the statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution. Sharpe Ratio: the return over the risk free rate per unit of risk. Tracking Error: the standard deviation of the difference between the strategy and index performance. Price/Earnings: the ratio of a firm's closing stock price and its trailing 12 months' earnings/share. Price/Cash Flow: the ratio of a firm's closing stock price and its fiscal year end cash flow/share. Price/Book: the ratio of a firm's closing stock price and its fiscal year end book value/share. Average Weighted Market Capitalization: the product of a security's price and the number of shares outstanding. Median Market Cap: the point at which half of the market value of a portfolio is invested in stocks with a greater market cap, and consequently the other half is invested in stocks with a lower market cap. Turnover: calculated by dividing the lesser of amounts of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the fiscal year.

The MSCI All Country World ex US Small Cap Index is a free float-adjusted market capitalization index that is designed to measure small cap developed and emerging market equity performance, excluding the US. The index consists of 46 developed and emerging market countries, and is comprised of companies that fall within a market capitalization range of USD 37-26,919 million (as of September 30, 2025). The index is net of foreign withholding taxes on dividends. You cannot invest directly in this index.

The Portfolio invests in foreign securities, which will involve greater volatility and political, economic, and currency risks and differences in accounting methods. It also invests in emerging markets, which involve unique risks, such as exposure to economies less diverse and mature than the U.S. or other more established foreign markets. Economic and political instability may cause larger price changes in emerging markets securities than other foreign securities. Investing in participation notes involve the same risks associated with a direct investment in the underlying security, currency or market. The securities of smaller companies have historically exhibited more volatility with a lower degree of liquidity than larger companies.

The Portfolio's investment objectives, risks, charges and expenses must be read and considered carefully before investing. The statutory and summary prospectuses contain this and other important information about the investment company. They may be obtained by calling toll free (877) 435-8105 or visiting hardingloevnerfunds.com.

While the Portfolio is "no load", management and other expenses still apply. Please refer to the Prospectus for further details. The Portfolio is distributed by Quasar Distributors, LLC.
