## Investment Perspectives

### Market

The MSCI ACWI ex US Index declined 4.9% this month, lagging both the US and Emerging Markets despite the European Central Bank cutting rates for the third time this year. Regionally, Pacific ex Japan dropped more than 6% while Emerging Markets fell 4%, dragged down by China, as investors worried that the magnitude of fiscal and monetary policy stimulus measures announced in the third quarter might not be enough to boost consumption. All sectors posted negative returns. Continued weak demand in China weighed on Consumer Staples and Materials, which both fell nearly 8%. Information Technology declined less—just over 2%—supported by strong performance from semiconductor companies benefitting from artificial intelligence (AI) demand.

### Portfolio

Shares of semiconductor manufacturer **TSMC** surged after the company reported strong quarterly earnings, with gross margins of 58% surpassing the 55% consensus expectation due to high fab utilization, cost reductions, and enhanced productivity. The company increased its full-year revenue growth forecast from 25% to 30%, citing AI demand for leading-edge technologies and better-than-expected growth in smartphones. Management also noted that the number of AI chips used in PCs and smartphones is expected to grow faster than unit growth for PCs and smartphones, which remains in the low single digits. TSMC is also using AI and machine learning for R&D in its fabrication facilities, which should further boost the company's productivity, efficiency, speed, and quality. A 1% productivity gain would lead to a profit gain of almost US\$1B for the company.

\*FRONTIER\*: Includes countries with less-developed economies

- In Energy, UK oil and gas company **Royal Dutch Shell** eked out a small gain. Oil prices rose sharply following Iran's attack on Israel, only to fall once Israel's retaliatory strike did not target any Iranian oil and gas infrastructure.
- In Industrials, shares of Swedish industrial tool and equipment maker **Atlas Copco** sank as the company reported that order, sales, and profit growth for the company's compressors was slightly below expectations.
- In the eurozone, French cosmetics manufacturer **L'Oréal** declined after reporting third-quarter sales that were below expectations. Cosmetics manufacturers continue to face shrinking demand in China.

\*OTHER\*: Includes companies classified in countries outside the index.

- In Consumer Staples, Mexican bottler and convenience store operator **FEMSA** detracted. Claudia Sheinbaum's decisive Presidential victory and her party's gains in the legislature in June led to a large drop in Mexican stocks as investors feared more populist policies.
- In the eurozone, French computer-aided design software developer **Dassault Systèmes** reported relatively tepid growth compared to peers in the broader software universe, in part due to weak sales of its clinical research platform Medidata.
- A bright spot was Canadian financial services and insurance provider **Manulife**, which reported strong first-and second-quarter earnings, aided by a rebound in its wealth management and insurance businesses in Asia. Additionally, Taiwan's TSMC continued to be a strong contributor, benefiting from the enthusiasm surrounding AI.
