Investment Objective and Policies

Investment Objective:

The investment objective of the Fund is to achieve long-term capital appreciation by investing primarily in global equities.

Investment Policies:

The Fund seeks to achieve its objective by investing in companies based both inside and outside the United States, as well as in established companies in emerging and frontier markets that the Investment Manager regards as well managed, financially sound, fast growing, strongly competitive, and priced by the market below their estimated value.

The Fund will invest in freely transferable equities and equity related securities, primarily of issuers listed or traded on a regulated stock exchange or market, including emerging as well as developed markets.

The securities will primarily be common stocks and other securities with equity characteristics, including but not limited to preferred stocks, warrants (not more than 5% of the Fund's Net Asset Value), rights (which are issued by a company to allow holders to subscribe for additional securities issued by that company), convertible securities, Depository Receipts, equity-linked notes and participatory notes as more particularly set out in the section "Funds" in the Prospectus.

The Fund will invest on a long only basis.

The Fund may also invest (up to 10% of its Net Asset Value) indirectly in such securities through holdings in open-ended collective investment schemes that satisfy Regulation 3(2) of the Regulations which shall be predominantly in the form of exchange traded funds and listed and traded in the United States and Europe.

Under normal circumstances at least 80% of the Fund's net assets will be invested in the foregoing instruments, i.e., freely transferable equities and equity related securities, primarily of issuers listed or traded on a regulated stock exchange or market, including emerging and frontier as well as developed markets. The Fund will be highly diversified and therefore will not be concentrating on any specific regions or economic sectors. It will pursue a policy of active stock selection in the markets in which it operates.

No more than 25% of the net assets of the Fund may be invested in emerging and frontier markets.

The Fund may hold investments from time to time that are listed or traded in Russia. It is not anticipated that such investments will normally constitute a substantial element of the Fund and shall not in any event exceed 20% of the net assets of the Fund. Investment will only be made in equity securities that are listed or traded on level 1 or level 2 of the RTS Stock Exchange and MICEX.

Investment Restrictions

The general investment restrictions set out under the heading **FUNDS – Investment Restrictions** in the Prospectus shall apply. In addition, the following investment restriction applies to the Fund:

Controversial Weapons

In pursuing its investment objective, the Fund will be prohibited from investing in "controversial weapons", being companies that have any ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments.

Borrowings

In accordance with the general provisions set out in the Prospectus under the heading **FUNDS – Borrowing and Lending Powers** the Fund may borrow up to 10% of its net assets on a temporary basis.

Leverage

It is not intended that the Fund will be leveraged, however, should leverage be generated by the use of financial derivatives instruments, it will not exceed 100% of the Net Asset Value of the Fund thus total exposure cannot exceed 200% of Net Asset Value. The market risk of the Fund associated with the use of financial derivative instruments will be measured using the commitment approach in accordance with the requirements of the Central Bank.

Risk Factors

The general risk factors are set out in the Prospectus under the heading **RISK FACTORS**. In addition, the following risk factors apply to the Fund:

Market Risk

Investments in the Fund may lose value due to a general downturn in stock markets.

Currency Risk

The Base Currency of the Fund is US Dollars. As the Sterling, Euro, Singapore Dollar, Australian Dollar, Swiss Franc and Canadian Dollar Classes are denominated in currencies other than the Base Currency of the Fund, and as currency conversions will take place on subscriptions, redemptions and distributions at prevailing exchange rates, the Euro, Sterling, Singapore Dollar, Australian Dollar, Canadian Dollar and Swiss Franc Class Shares will have a currency risk exposure to US Dollars.

Emerging Market and Frontier Market Risk

Emerging market securities involve unique risks such as exposure to economies less diverse and mature than that of the United States or more established foreign markets. Economic or political instability may cause larger price changes in emerging market securities of issuers based in more developed countries.

Investments in frontier markets involve risks similar to investments in emerging markets but to a greater extent since frontier markets are even smaller, less developed and less accessible than emerging markets. Frontier markets may also experience greater political and economic instability and may have less transparency, less ethical practices, and weaker corporate governance compared to emerging markets. The countries that comprise frontier markets include the lesser developed countries located in Africa, Asia (including countries in the Commonwealth of Independent States, formerly the Soviet Union), the Middle East, Eastern Europe and Latin America.

Russian markets

As the Fund may invest in Russia, investors should note that Russia has different corporate governance, auditing and other financial standards to developed markets, which could result in a less thorough understanding of the financial condition, results of operations and cash flow of companies in which the Fund invests. Accordingly, an investment in shares of a Russian corporation may not afford the same level of investor protection as would apply in more developed jurisdictions.

Risk Management Process

The Fund employs a Risk Management Process which enables it to accurately measure, monitor and manage the various risks associated with financial derivative instruments and which is available to investors.

Dividend Policy

There are no dividend entitlements for Euro, US Dollar, Singapore Dollar, Australian Dollar, Canadian Dollar or Swiss Franc Classes.

The Directors intend to declare a dividend in respect of the Sterling Class I Shares, Sterling Class R Shares and Sterling Class X Shares such that substantially all of the net income relating to such Classes shall be distributed on a semi-annual basis (on or about 15 January and 15 July in each calendar year). Such dividends shall be paid to Shareholders in accordance with the terms of the Prospectus.

Profile of a Typical Investor

The Fund is suitable for investors seeking capital growth who are prepared to accept a medium to high degree of volatility over a five to seven year market cycle.

Benchmark Index

The Fund's performance will be compared to the MSCI All Country World Index (the "**Comparator Benchmark**"). The Comparator Benchmark is a market capitalization-weighted index designed to provide a broad measure of equity-market performance throughout the world. The Comparator Benchmark is used to compare the performance of the Fund against but is not used to constrain portfolio composition or as a target for the performance of the Fund.
